

Interactive Learning Platform

Learning Path Management :

Allows instructors to organize courses into structured learning paths with sequential modules, helping students follow a clear and organized learning journey.

Course Creation :

Allows instructors to create, organize, edit, and publish courses by adding course information, learning materials, and modules.

Course Enrollment :

Enables students to browse available courses and enroll in them, granting access to all course content and learning resources.

Video Lectures :

Allows instructors to upload video lessons that students can watch online at their own pace to support flexible learning.

Assignment Management :

Enables instructors to create assignments with deadlines while allowing students to submit their work electronically for evaluation.

Quiz System :

Allows instructors to create quizzes and assessments that students can complete online to test their understanding of course materials.

Automatic Grading :

Automatically evaluates objective-type quizzes, calculates scores, and instantly displays results to students.

Progress Tracking :

Tracks each student's learning progress by monitoring completed lessons, assignments, quizzes, and overall course completion.

Certificate Generation :

Automatically generates and issues digital certificates to students after they successfully complete a course and meet all requirements.

Discussion Forum :

Provides an interactive space where students and instructors can ask questions, share knowledge, and participate in course discussions.

Announcements :

Allows instructors to publish important course updates, reminders, and notices to keep students informed about upcoming activities.

Notifications :

Sends timely alerts regarding assignments, quizzes, announcements, grades, and other important course-related events.

File Uploads :

Enables instructors to upload learning materials and allows students to submit assignments, projects, and supporting documents.

Course Search :

Provides a search and filtering system that helps users quickly find courses based on keywords, categories, instructors, or difficulty levels.

Wishlist / Bookmark Courses :

Allows students to save courses of interest in a personal wishlist for easy access and future enrollment.

Instructor Dashboard :

Provides instructors with a centralized dashboard to manage courses, monitor student performance, and track course activities.

Student Dashboard :

Displays a personalized overview of enrolled courses, learning progress, upcoming deadlines, quiz results, and certificates.

Analytics Dashboard :

Presents visual reports and statistics that help instructors and administrators analyze student engagement and course performance.

Admin Panel :

Provides administrators with complete control over users, courses, categories, platform settings, and overall system management.

Course Reviews & Ratings :

Allows students to rate courses and provide feedback, helping improve course quality and assisting future learners in course selection.
