

Vehicle Rental Platform

Vehicle Listing :

Allows administrators to add, update, and manage vehicle information, including images, specifications, rental prices, and availability.

Advanced Vehicle Search :

Enables users to search for vehicles using keywords and apply filters such as vehicle type, price range, seating capacity, fuel type, and transmission.

Vehicle Availability Checker :

Displays the real-time availability of vehicles based on the selected rental dates to prevent double bookings.

Online Vehicle Booking :

Allows customers to reserve available vehicles by selecting pickup and return dates, locations, and rental duration.

Booking Management :

Enables users to view, modify, cancel, or reschedule their bookings while allowing administrators to monitor all reservations.

Rental Cost Calculator :

Automatically calculates the total rental cost based on rental duration, vehicle type, additional services, taxes, and applicable discounts.

Pickup & Return Location Selection :

Allows customers to choose convenient pickup and drop-off locations when making a vehicle reservation.

Vehicle Maintenance Tracking :

Helps administrators schedule and monitor vehicle maintenance to ensure all rental vehicles remain in good operating condition.

Customer Reviews & Ratings :

Allows customers to rate vehicles and share their rental experiences, helping future customers make informed decisions.

Wishlist / Favorite Vehicles :

Enables users to save preferred vehicles to a wishlist for quick access and future bookings.

Booking History :

Maintains a complete history of previous and current rentals, allowing users to review their past bookings and invoices.

Invoice Generation :

Automatically generates downloadable invoices containing rental details, payment information, and booking summaries after each completed reservation.

Notifications & Reminders :

Sends timely notifications regarding booking confirmations, pickup schedules, return reminders, cancellations, and special offers.

Interactive Vehicle Gallery :

Displays multiple high-quality images and detailed specifications of each vehicle to help customers make informed rental decisions.

Customer Dashboard :

Provides customers with a personalized dashboard to manage bookings, view rental history, invoices, favorite vehicles, and notifications.

Admin Dashboard :

Provides administrators with a centralized dashboard to manage vehicles, bookings, customers, maintenance schedules, and business statistics.

Analytics & Reports :

Generates visual reports showing booking trends, revenue, popular vehicles, customer activity, and fleet utilization to support business decisions.

Discount & Coupon Management :

Allows administrators to create promotional offers and discount coupons that customers can apply during the booking process.

Driver Service Option :

Gives customers the option to rent a vehicle with or without a professional driver based on their travel requirements.

Fleet Management :

Enables administrators to monitor the overall fleet by tracking vehicle availability, maintenance status, rental schedules, and operational performance.
